North Star Academy June Exam Schedule 2017

Preparing for Examinations

Preparing adequately for exams is a process, not a one-time, one-day event. Learning to use your study time wisely as you prepare for an exam will help you perform better.

Prepare systematically for your examinations

1. Set aside one hour each week to review previously studied and new material for that week. Understand that repetition aids in recall.
2. Arrange a schedule for review of materials before an exam. Do not plan the review only for the day before or the day of the exam.
3. Review by making a list of important topics. Under each topic, place items important to that topic.
4. Make a condensed summary or outline of the material reviewed, and study it thoroughly.
5. Review selectively. Give special attention to areas of the subject in which you are weak.
6. Cramming, as a concentrated review of material previously learned, is beneficial. BUT, cramming as a last minute effort to learn is harmful because it results in a confused mass of undigested material.
7. Predict questions which you would ask if you were the instructor, and then be sure you know the correct answers.
8. Find out from the instructor the kind of test that will be given and material to be covered.
9. Know the difference between essay and objective examinations.
10. Analyze previous and present examinations to determine your weaknesses.
11. While studying and working problems, duplicate the test situation by setting your alarm clock to ring at the end of a certain period of time.
12. When studying the night before an exam, reduce, restrict or eliminate caffeine. Caffeine will make you feel more awake, BUT, side effects of caffeine include rapid heartbeat, headache, muscle tension, rapid breathing, all of which may be interpreted by some as test anxiety (which often has the same symptoms). Also the caffeine will keep you up-BUT make it difficult to go to sleep when you wish.
13. The night before an exam, get a good night's sleep so that your mind will be the most rested it can be for the exam.
14. A quick review of materials in the morning of an exam may help solidify points that are more difficult.
15. Don't forget to have a good breakfast and most important breath!

Good Luck!
